FAQ

Does the camera work wirelessly?

Yes, this camera works wirelessly, but if intended to fixed to a wall, it must be drilled in.

Does this camera work with Smart Speakers that come with a screen?

Unfortunately, there is no current support to view the cameras using the screen on a smart speaker such as the Echo Show 5. The screen can be viewed on the Tuya Smart / Smart Life app. Multiple cameras can be viewed at the same time.

Can I flip the image when hanging it upside down?

Yes, the image can be flipped through the app.

Can I select the time when I would like the camera to give me motion detection alerts?

Yes, you can schedule when you would like motion detection to be activated or de-activated.

Can I view the camera's recordings through the app?

Yes, once a TF card has been installed, you can review previous recordings, depending on the size of the TF card. We recommend a 64Gb TF card for the clearest viewing for up to 1 week.

Will the camera work with other Tuya devices?

Yes, the camera can be automated to work with other Tuya devices, such as turning on your Tuya-connected garden lights when motion is detected. This can work as burglary deterrent.

What's the camera's viewing angle?

3.6 mm Lens, diagonal viewing angle: 100 degree

How long can the camera work without charging?

It can be used or 2-3 months if working 60 minutes a day (motion detection mode) with 4 pcs of 18650 batteries.

Can customer and someone else monitor by phones at the same time?

The primary account of a camera can be shared with 8 mobile phones, but only 3 cameras can be viewed online at the same time.
