COLOCATION

A person in a dark suit is shown from the chest up, interacting with a futuristic digital interface. The interface is composed of glowing blue lines, icons, and arrows, set against a dark blue background. The person's hand is positioned as if touching or pointing at a specific element on the screen. The overall aesthetic is high-tech and professional.

A colocation data center is a physical facility that offers space with the proper power, cooling and security to host businesses' computing hardware and servers.
