

We are HIRING!

IT Executive (Full Stack Application Developer)

Innovation

Job Summary

We are seeking a talented Full-Stack Application Developer to join our vibrant team. As a pivotal member, you will be instrumental in crafting, implementing, and maintaining cutting-edge websites and applications (web/mobile). The ideal candidate will possess a diverse skill set, blending proficiency in coding languages, expertise in content management systems, and a good grasp of UI/UX principles.

Requirements

- Bachelor's degree in Information Technology, Creative Computing, or related fields.
- Demonstrated experience as a Full-Stack Application Developer or similar role.
- Strong coding skills encompassing HTML, CSS, PHP, Python, C#, JavaScript, Ruby, and other relevant languages.
- Proficiency in web interface design solutions utilizing tools like Figma, Flutter, and/or Adobe XD.
- Proficiency in mobile framework development for both Android and iOS platforms.
- Proficiency in Web API for seamless integration with various system.
- Familiarity with version control systems (e.g., Git) and collaborative development workflows.
- Familiarity with Java languages and experience with REST and SOAP APIs Development.
- Excellent communication and teamwork skills.
- Proficiency in Content Management Systems (CMS) such as WordPress.

Key Accountabilities

- Design, develop, and maintain responsive web & mobile applications (Android/iOS), ensuring seamless integration of front-end and back-end functionalities.
- Design, develop, and maintain APIs to facilitate seamless communication between software applications, ensuring efficient data exchange and system interoperability.
- Identify and resolve technical issues to ensure optimal performance and user satisfaction.
- Collaborate with stakeholders to create visually appealing and user-friendly interfaces with UI/UX principles.
- Create and maintain clear documentation for code, processes, version control and system architecture.
- Optimize web application performance through code optimization, caching strategies, and database query tuning, while implementing security best practices.
- Utilize middleware integration solutions to integrate web applications, enhancing data exchange and system interoperability, particularly in enterprise environments.
- Leverage CMS proficiency for efficient content creation and management.
- Integrate web applications with backend Business Support Systems (BSS) to streamline business operations.
